#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

Applicants' response to the Official Communication on November 16, 2004 is noted. Applicants state that new claim 15 is readable on the elected invention of Group III because it includes all limitations of the originally elected claim 12. As noted by the Examiner, claim 15 also includes the formula recited in original claim 3 which is an additional limitation which is directed to the same invention of Group III (i.e., claim 15 is within the scope of elected claim 12). Claims 12 and 15 are related as subcombination and combination which should be examined in the same application in accordance with M.P.E.P. j 806.05(c) because there has been no demonstration of two-way distinctness as required by the Manual of Patent Examining Procedure. In view of applicants' response above, the reply is responsive and the present claims would be examined. However, the present claims are subject to species election/restriction as follows:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Claim 15 is generic to a plurality of disclosed patentably distinct species comprising:

A. Kind of amino acid residues e.g., natural or non-natural amino acid.

B. The number and combinations of amino acid residues in a well in each plate. (For example, 2 for A and 3 B for on a single well.)

C. The length of a peptide in a library.

Each of the species covered in each of groups A-C differs in structure and mode of action or function for a particular enzyme. The kind of amino acids present in a particular peptide sequence may react with different or the same types of enzyme. Because of the numerous possible peptide that can be formed from the possible combinations of amino acids, a prior art reference anticipating one peptide species (substrate) would not render obvious the other substrate species comprising different peptide sequence.

Applicants are required under 35 U.S.C. 121 to elect a single disclosed species (*i.e., one species from each of A, B and C*) even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

Art Unit: 1639

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to T. D. Wessendorf whose telephone number is (571)272-0812. The examiner can normally be reached on Flexitime.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Wang can be reached on (571)272-0811. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
